We Understand Racetrack Safety

SAFER Barrier

S.A.F.E.R. Barrier

"Steel. And. Foam. Energy. Reduction. Barrier"

SAFER Barrier also commonly known as a "soft wall" was developed and tested for 5 years before the first installation took place at the Indianapolis Motor Speedway in 2002. SAFER barrier is the optimal solution for permanent and temporary street courses at high speed and impact sections of the track.

The system is designed to absorb and reduce kinetic energy during the impact of high-speed crashes, and lessens the impact and injuries sustained to drivers as well as spectators. SAFER barrier systems have proven its effectiveness by withstanding thousands of crashes and saving countless lives.

SAFER Barrier can be installed on:

- Permanent or fixed concrete walls
- Temporary or removable concrete barriers
- Concrete foundations with no vertical concrete structure behind the SAFER barrier system. This option is the free standing - new generation system
- New Generation SAFER barrier can also integrate debris fence into the system

Established as a commercial fence contractor in 1977, Smith became involved in the racing industry in 1985. We have made it our business to understand everything there is to know about safety systems and racetrack construction. With major success over the years, it led us to building numerous temporary street circuits, permanent tracks and ultimately manufacturing and installing S.A.F.E.R. barrier systems.

Today, Smith is a third-generation family run business and we have grown to become the "go to" company for racing projects throughout the United States, Canada, Europe and Asia. The experienced team at Smith understands the nuances of racetrack projects and what it takes to get the job done.

We understand urgency and time constraints. Failure to complete a project on time is not an option. Since 1985, ALL of our projects have been completed on time or ahead of schedule.

No matter what your track needs are -big or small -there is no better company to call on than Smith Safety Systems. We invite you to allow us to help with all your Racetrack Safety needs. SMITH is the best choice!

We welcome your call and look forward to the opportunity to work together!

Best regards,
The Smith Safety Systems Team

Crash Fence

Smith is the leader in fabrication and installation of crash fence. We are experts in building temporary circuits, fabricating and installing permanent fence systems, as well as modifying existing crash fences to meet new safety demands and regulations.

Smith fabricates and installs:

- All the steel components needed for crash fencing systems at a permanent track
- All the cabling, mesh, and component parts required for a complete safety system
- Crash rated pedestrian gates and ARMCO gates
- Starter stands

Our team is able to furnish a safety response team during events to repair potential damage to crash fencing. Smith is the expert that will show up and perform on every project, every time. We have made it our business to understand all facets of racetrack safety.

Benefits of SAFER BARRIER vs other plastic barriers

Quantity of barriers for	SAFER Barrier	Plastic Barrier
1000 meter installation	117	750
Truckloads of material	9	15
Manpower needed for installation	6	4-5
Time to install	9 days	15 days
<i>(14 days for NEW Generation SAFER Barrier)</i>		
Need concrete wall or Tri Rail ARMCO for backing	NO *	YES
<i>*No – for NEW Generation SAFER Barrier</i>		
Warping	NO	YES
Discoloration	NO	YES
Splitting	NO	YES
Cars can get under the Barrier in an accident	NO	YES
Galvanized Steel	YES	NO
Vehicle access gates installed into barrier system	YES	NO

Smith's experienced Safety Team is always at your disposal. Allow Smith to help work with your team on your next project or event. Think SAFER Barrier on your next evaluation of your safety system. **It just makes sense.**
